

Disruption of water service/precautionary boil water advisory notification for Wagon Wheel Mobile Home Park

Toho Water Authority customers living at Wagon Wheel Mobile Home Park in Kissimmee will experience a disruption of their water service starting around 9 a.m. on Tuesday, November 14, 2017.

This interruption of service is due to repairs being performed in this area. Service is expected to be restored around 2 p.m.

Once service is restored a precautionary boil water advisory will go into effect and remain until rescinded by Toho Water Authority.

Under a precautionary boil water notice, water used for consumption can be disinfected by any one of the following methods:

- Bringing the water to a rolling boil and holding it there for one (1) minute.
- Using a disinfecting chemical. If you cannot boil water, you should put eight (8) drops of common household bleach which is about 1/8th teaspoon, into one (1) gallon of tap water, then shake it, and allow it to stand for 30 minutes before drinking. If the water is cloudy, use sixteen (16) drops, about 1/4th teaspoon of bleach instead of 8, shake it, and let it stand for 30 minutes. There should be a slight chlorine odor. Use common household bleach that has 5% to 6% active ingredients. Use food grade containers. Do not use bleach that has perfume scents added.
- Using water purification tablets or iodine that many sports and camping stores sell.
- You can also buy commercial bottled water for consumption and food preparation.

Tap water may be used for showering, baths, shaving and washing. Children and disabled individuals should have their baths supervised to ensure water is not ingested. Though the risk of illness is minimal, individuals who have recent surgical wounds, are immunosuppressed, or have a chronic illness may want to consider using bottled or boiled water for cleansing until the notice is lifted.
