

Toho Water Buenaventura Lakes WTP Upgrades

What This Project Brings to Our Community

We are excited to share that upgrades are underway at the **Buenaventura Lakes Water Treatment Plant**! This project is all about caring for our neighbors by delivering the cleanest, highest-quality drinking water and ensuring our services remain reliable for years to come.

As part of these improvements, we are transitioning to a modern ion exchange treatment system, a major step forward that will significantly improve efficiency and enhance your water quality. Additionally, we are installing a new stormwater management system to better safeguard the facility during heavy rains, ensuring your water service stays strong and uninterrupted no matter the weather.

We remain committed to supporting our community with the high-quality water and dependable service you deserve every single day.

2024

construction started in
Nov. of this year

2027

Sept. is the target date
to end construction

7am- 4pm

most construction will
take place during these
hours
