

Toho Water Parkway WRF Expansion

What This Project Brings to Our Community

We are expanding the **Parkway Water Reuse Facility** to better serve our growing community.

This major upgrade will increase our reclaimed (recycled) water capacity from **1.5 million gallons per day** up to **3.5 million gallons per day** (enough water to fill just over five Olympic-sized swimming pools to the brim). By more than doubling our output, we can provide significantly more high-quality reclaimed water to our customers for lawn and landscape irrigation, helping conserve our local water resources for years to come.

2027

construction expected
to start in Jan. '27

2030

anticipated end of
construction is Oct. '30

\$100_M

expected cost to
dramatically increase
water for irrigation
